Front-End Developer

Front-End Developer skilled in JavaScript, React, Redux, HTML, and CSS. Completed a Full-Stack Web & Mobile Development Bootcamp. Strong background in diagnostics and problem solving from the automotive field; eager to apply skills to building user-friendly applications.

PROJECTS

Le Reserve Motorworks Website - (*React, Vite, Tailwind CSS, JavaScript*)

Link: [Le Reserve Motorworks LLC](#)

- Built and deployed a responsive website to showcase luxury automotive restoration services
- Developed a modern single-page layout using React and Vite
- Styled components with Tailwind CSS for a clean, mobile-friendly design
- Added customer estimate form for direct inquiries and improved user engagement
- Hosted and deployed on Vercel with continuous integration

EXPERIENCE

Le Reserve Motorworks, Lawrenceville, GA - Owner & Operator

AUGUST 2025 - PRESENT

- Perform high-precision trim restoration for Ferrari interiors, requiring attention to detail and problem-solving under strict quality standards
- Manage full project lifecycle from customer intake to final delivery mirroring agile workflows in software development.
- Handle business operations independently, including scheduling, documentation, and client communication demonstrating adaptability and ownership.

Ferrari of Atlanta, Roswell, GA - Master Certified Technician

JULY 2022 - AUGUST 2025

- Diagnosed and repaired complex electrical/mechanical issues using diagnostic software and system diagrams which mirrors front-end debugging and issue triage
- Document findings and communicated clearly with service teams/customers to ensure quality repair and satisfaction
- Maintained disciplined, standards-driven workflows aligned with strict quality guidelines
- Applied diagnostic thinking and step-by-step documentation and skills directly transferable to software debugging and system troubleshooting
